F O R E W O R D

Statistics for Profit is a summary of trade data designed to help Ontario manufacturers assess their market potentials at home and abroad. As complementary material to its companion publications, ONTARIO EXPORTS BY COUNTRIES AND ONTARIO EXPORTS BY COMMODITIES, it highlights the most important aspects of Ontario's trade and trade opportunities.

This publication has two prime objectives. The first is to make domestic manufacturers aware of the magnitude and trends of major Canadian imports of manufactured goods and thereby point out the possibility of import substitution in certain instances.

The second objective is to indicate market potential abroad for Ontario and Canadian exporters. Thus the major imports of the U.S., U.K., West Germany and Japan from all countries have been compared with their imports from Canada.

These four countries have been chosen for special attention because together they account for 86% of all Ontario exports. Ontario exports to these four markets have been included in this publication. These figures serve both as a handy summary of the major portion of Ontario's trade, and as an indication of the Province's current performance in these markets.

While it is undoubtedly true that there is still considerable room for increased exports to these traditional markets, Ontario manufacturers in coming years are going to have to exploit more vigorously the potential of the markets of Asia, Africa, Latin America, Eastern Europe and the Middle East, that has been largely ignored by the exporters of this Province in the past.

For the first time we are able to present Ontario's exports "by stage of fabrication" to all countries and areas with which the Province trades.

What emerges clearly from these figures is Ontario's role as a resource hinterland to Western Europe, the U.S. and Japan, and even Eastern Europe. Thus in the case of Western Europe and Japan less than 20% of Ontario exports to these areas consist of fully manufactured goods. This is a cause for concern, since it is end products and not raw and fabricated materials, that incorporate the highest inputs of

Canadian labour and Canadian technologies.

Data on Ontario and Canadian exports were taken from special Statistics Canada tables. U.S., U.K., West Germany and Japan import data were obtained from the U.N. Commodity Trade Statistics.

ABBREVIATIONS

For reasons of conformity, in *Statistics for Profit* we have used the same abbreviations that are used by the Dominion Bureau of Statistics in its publications, with the relative explanations.

n.e.s.	not elsewhere specified
T.I.	tariff item
C.R.	cold rolled
H.R.	hot rolled
-	no equivalent class

Suppl.	Supplies

SUMMARY OF ONTARIO EXPORTS

Ontario exports in 1970 amounted to \$7,527 million. This represented an increase of 10.5% over 1969.

Of the six broad commodity groups, live animal exports showed the greatest percentage increase; exports under this category rose by 34.4% to reach \$36 million. However, it was exports of fabricated materials that showed the greatest absolute increase - \$284 million - over the previous year.

The U.S., the U.K., West Germany, Japan, Australia and Norway are Ontario's major markets. Together these countries accounted for 90% of Ontario's exports, with the U.S. being the principal single market (78%).

Source: Statistics Canada
Ontario Exports by Countries, 1970

Exports accounted for 22% of Ontario's gross provincial product in 1970; in comparison, Canadian exports made a 20% contribution to Canada's Gross National Product. In view of our small domestic market, exports are of vital importance to many industries.

Canada and Ontario have been successful in expanding their exports of industrial products apace with industrial development. Though this is largely due to the Canadian-U.S. Automotive Agreement, significant increases in exports have been recorded in such commodities as specialty machines, electronic products, office equipment, etc.

CANADIAN IMPORTS OF SELECTED MANUFACTURED GOODS 1966-1970

Canadian imports increased from \$9.8 billion in 1966 to \$13.9 billion in 1970. This reflected our increased production capacity, our rising purchasing power and the upward trend in our standard of living. It also indicated the existence of international specialization, particularly in manufacturing industries.

Statistical data on Canadian foreign trade are classified into six broad sections. The following shows Canadian imports by commodity groups 1966-1970.

CANADIAN IMPORTS BY SECTIONS 1966-1970

(\$ millions)

SECTIONS	1966	1967	1968	1969	1970
I LIVE ANIMALS	12.9	21.9	15.6	18.7	30.5
II FOOD, FEEDS, BEVERAGES AND TOBACCO	791.7	861.6	902.6	1,043.9	1,085.1
III CRUDE MATERIALS, INEDIBLE	1,023.5	1,062.8	1,126.7	1,054.8	1,171.6
IV FABRICATED MATERIALS, INEDIBLE	2,233.1	2,310.2	2,434.6	2,905.4	2,885.4

VI SPECIAL TRANSACTIONS, TRADE	322.2	269.3	258.9	192.0	161.3
TOTAL -	9,866.8	11,081.2	12,366.7	14,201.7	13,939.4
% change from previous year	+14.3	+12.3	+11.6	+14.8	-1.8

Source: Statistics Canada

More significantly, the most important import section namely "End Products, Inedible", (manufactured goods) increased in the period 1966-1970 by 57%. This is of extreme significance due to the fact that manufacturing, has been and still is, one of the major contributors to our economic growth and development.

On the following pages are details on "Canadian Imports of Selected Manufactured Goods, 1966-1970", which could indicate opportunities for Ontario industries to produce some of these products domestically.

CANADIAN EXPORT OPPORTUNITIES WITH SELECTED COUNTRIES

A) U.K. IMPORTS

The U.K. is the second largest customer of both Canada as a whole, and of Ontario.

In 1970 British imports were valued at \$22.4 billion and imports from Canada accounted for 6.7% of this total, a slightly larger share, than the 5.6% of the market Canada enjoyed in 1969. Canadian exports to the U.K. were valued at \$1.5 billion in 1970.

The largest group in the U.K. imports in terms of value was the category "manufactured goods classified chiefly by material". These imports were worth \$4.9 billion in 1970 well ahead of the value of imports of "food and live animals" (\$4.3 billion). Individually however, the largest single items in the U.K. import total were petroleum fuel and products, and non-electrical machinery.

In terms of individual commodities the largest items exported to Britain from Canada consisted of such primary industrial products as pulp and paper and such raw materials as nickel ore, iron ore, copper and aluminum.

Ontario exports to the U.K. in 1970 were worth \$500 million. This represented 33% of all Canadian exports to the U.K. The major items in 1970 were as follows:-

Nickel in ores concentrates scrap	\$130 million
Copper and alloys	\$ 54 million
Unmanufactured tobacco	\$ 47 million
Precious metals in ores, concentrates scrap	\$ 43 million

SELECTED MAJOR CANADIAN AND ONTARIO DOMESTIC EXPORTS TO U.K. 1970

B) JAPAN'S IMPORTS

The value of total Japanese foreign trade in 1970 was \$38 billion. Japan's imports were valued at \$18.9 billion and exports \$19.4 billion.

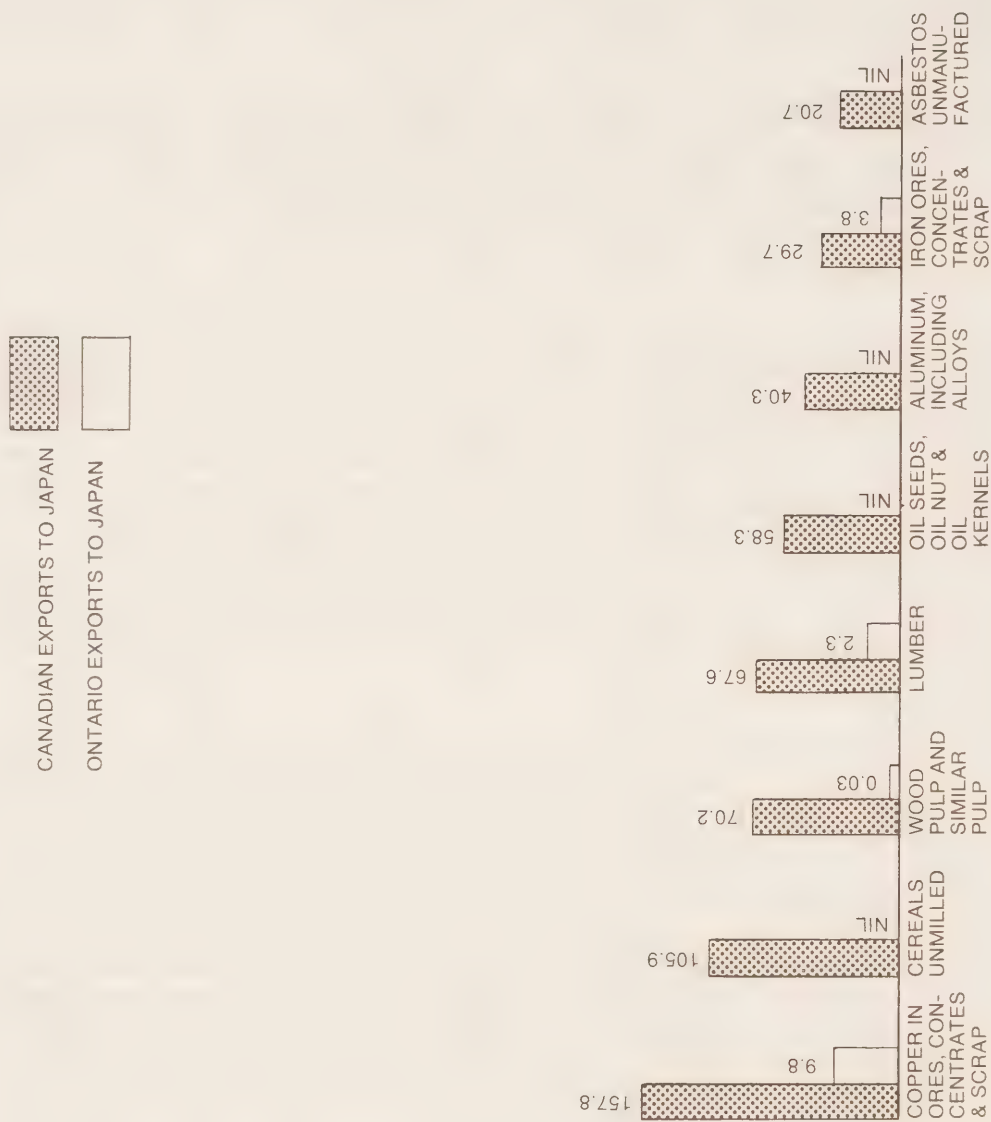

Japan represents a fast-expanding trade partner for both Canada and Ontario: between 1968 and 1970, Canada's exports to Japan grew from \$608 million to \$796 million (a 30.9% increase), and Ontario exports increased from \$44 million to \$71.3 million (or up 62.0%). In 1970, Canada accounted for 4.2% of all Japanese imports.

The largest group in Japan's imports were "crude materials, inedible, excluding fuels". In 1970, this group amounted to \$6,635.3 million, or 35.1% of total Japanese imports. Canada's share in this category was largest in copper ores and concentrates (\$148.6 million) and sulphate wood pulp (\$76.5 million). This was followed by "mineral fuels, lubricants and related materials", which amounted to \$3,905.8 million, or 20.7% of total Japanese imports. This reflects the nature of the Japanese economy, which relies heavily on imported raw materials for its industrial development, and subsequently exports fabricated products to finance such imports.

Of Japan's imports from Canada, classified by SITC and compiled by the Japanese Ministry of Finance, the largest group in terms of value was "crude materials inedible, excluding fuels" which amounted to \$562.6 million in 1970. This accounted for 70.7% of total Japanese purchases from Canada. "Manufactured goods, classified chiefly by materials" accounted for 11.6% of the total, amounting to \$92.1 million. In terms of individual commodities, the largest items were unmilled cereals (\$105.9 million), copper in ores, concentrates and scrap (\$157.8 million), lumber (\$67.6 million), pulp (\$70.2 million), oil seeds, nuts and kernels (\$58.2 million) and aluminum and alloys (\$40.3 million).

Ontario was responsible for only a very small part of Canadian exports to Japan: 8.9% in 1970, totalling \$71.3 million. This was largely due to the fact that none of the above-mentioned major items in Canadian exports to Japan originated in Ontario. The largest items in Ontario's exports to Japan in 1970 were copper in ores, concentrates and scrap (\$9.8 million), nickel in ores, concentrates and scrap (\$16.5 million), zinc in ores, concentrates and scrap (\$5.5 million), primary iron and steel (\$5.8 million) and office machines and equipment (\$2.8 million), and copper and alloys (\$3.9 million). The bulk of Ontario trade with Japan was predominantly in the field of natural resources, and this is likely to obtain for the foreseeable future.

Trade Statistics

C) West German Imports

West Germany's total imports were \$29.8 billion and exports \$34.2 billion in 1970. Canadian trade with West Germany was valued at \$758.5 million; in 1970 Canada exported goods worth \$387.6 million to West Germany and imported from it products to the value of \$370.9 million. Although this represented a small fraction of West German trade, the long-run expansion in German domestic demand should provide a favourable potential for Canadian and Ontario exports.

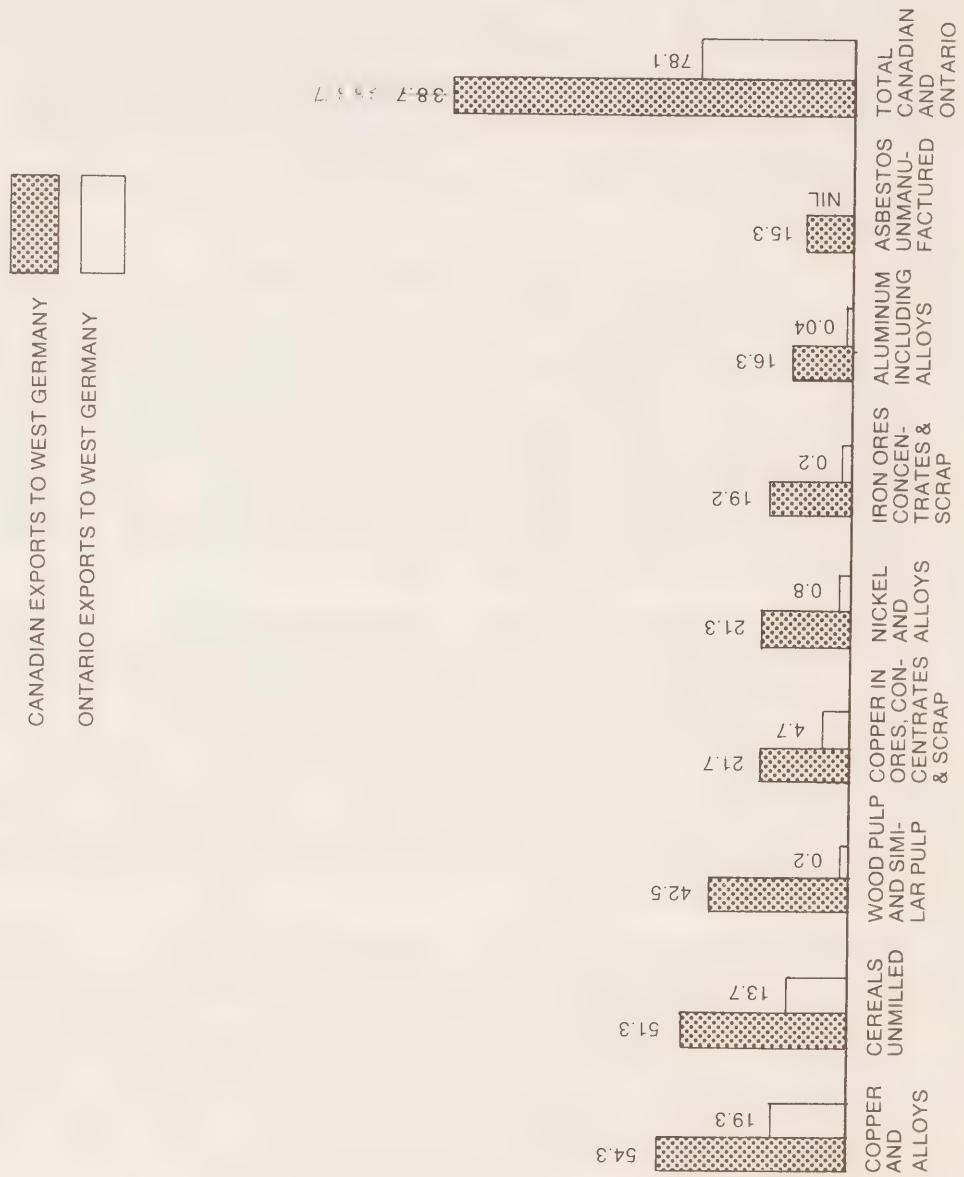

The largest group in the West German import total in 1970 was machinery and transport equipment with products worth \$5.6 billion. Road motor vehicle imports were worth \$1.8 billion as were machinery imports, and the value of West German imports of office machines was \$540 million. Imports of crude materials totalled \$3.7 billion with the main items being metal ores, textile fibres, wood and lumber and oilseeds, nuts and kernels. Mineral fuel imports worth \$2.6 billion in 1970 consisted primarily of crude petroleum and petroleum products.

Canadian exports to West Germany amounted to \$387.6 million in 1970 an increase of 38% over 1969. Principal commodities were raw materials and semi-processed materials. The largest items were copper and alloys \$54.3 million, unmilled cereals \$51.3 million; wood pulp \$42.5 million; copper ores, concentrates and scrap \$21.7 million; iron ores, concentrates and scrap \$19.2 million; aluminum and alloys \$16.3 million; unmanufactured asbestos \$15.3 million; and zinc ores concentrates and scrap \$5.6 million.

Ontario exports to West Germany were \$80.1 million in 1970, which represented 21% of total Canadian exports to that country. The composition of Ontario exports was slightly different from that of Canadian exports: thus while the largest items in the Ontario total consisted both of raw materials and manufactured goods, the bulk of Canadian exports to Germany was raw materials. The most important items in Ontario exports in 1970 were:

	<u>\$ Million</u>
Copper and alloys	19.3
Cereals unmilled	13.7
Oil seeds, oil nuts and oil kernels	5.8
Office machines and mis. equipment	5.5
Copper in ores, concentrates & scrap	4.7
Zinc in ores, concentrates & scrap	2.2
Measuring, laboratory, etc. equip.	2.0
Plastics & synthetic rubber, not shaped	1.0

D) U.S. Imports

United States is the largest customer of both Canada and Ontario, alone accounting for 65.1% of the former's and 77.8% of the latter's total exports in 1970. In turn, Canada is also the best customer of the United States.

In 1970, total U.S. imports amounted to \$40.0 billion, of which 28% came from Canada. The largest U.S. import group is "machinery and transport equipment", which amounted to \$11.2 billion in 1970. This is in large measure attributable to the Canada-U.S. Auto Pact, which led to imports of \$3.3 billion in road motor vehicles from Canada. The bulk of Canadian-U.S. and also Ontario-U.S. trade is concentrated in the Michigan-Ohio-Pennsylvania-New York-New Jersey area, where the bulk of U.S. auto industries and a large portion of the U.S. population can be found; the area's proximity to Ontario is also a contributing factor. The breakdown of U.S. imports and imports from Canada is shown below:

SITC	Description	----- 1970 -----		
		Total U.S. Imports	Total U.S. Imports From Canada (\$ Million)	% From Canada
0	Food and live animals	5,378.9	463.1	8.6

Ontario's exports of manufactured products, the bulk of which are included in the category end products, inedible, increased very slightly in 1970, in marked contrast to the rapid growth of previous years. The principal reason for this was the sluggish performance in auto exports, Ontario's principal export item, during the latter four months of the year; a direct result of a strike in the auto industry.

Apart from Road Motor Vehicles, the major items in Ontario exports are nickel, pulp and paper, copper, aircraft and distilled alcoholic beverages.

MAJOR ONTARIO EXPORTS

ONTARIO EXPORTS TO ITS MAJOR MARKETS

A) Ontario Exports to The U.K.

In 1970 Ontario exports to the U.K. were worth \$500 million an increase of 32% over the previous year. The 1969 value however, was unusually low because of the sharp decline in copper ore and nickel ore exports as a result of strikes in the Province's mining industry. Ontario normally accounts for just over one-third of the total value of Canadian exports to Britain.

Trend in Ontario Exports to U.K. 1967-1970

	<u>1967</u>	<u>1968</u>	<u>1969</u>	<u>1970</u>
Value \$ million	424	457	380	500
% change from previous year	+12.6	+7.7	-16.9	+31.7
Ontario as % of Canada	36	37	34	33

The U.K. is an important market for Ontario exports of crude materials, fabricated materials and agricultural products. The major items that the Province exports to Britain are listed below:

Major Ontario Exports to the U.K.

<u>Commodity</u>	<u>1969</u>	<u>1970</u>
	\$ million	
Nickel in ores, concentrates, scrap	87.5	130.0
Copper and alloys	26.5	54.1
Unmanufactured tobacco	54.3	47.5
Precious metals in ores concentrates, scrap	34.3	43.3
Nickel and alloys	8.3	26.9
Electronic and related equipment & components	2.7	17.3
Oil seed, cake and meal	11.8	12.6
Other organic chemicals	6.5	11.7
Office machines and equipment	7.0	11.5
Plastics and synthetic rubber, unshaped	8.9	9.4

ONTARIO EXPORTS TO ITS MAJOR MARKETS

B) Ontario Exports to Japan

In 1970 Ontario exports to Japan were worth \$71 million an impressive 30% increase over the previous year. However, Ontario still accounts for less than 10% of total Canadian exports to Japan.

The trends in Ontario exports to Japan since 1967 may be seen in the following table:

	<u>1967</u>	<u>1968</u>	<u>1969</u>	<u>1970</u>
Value \$ million	42.6	43.9	52.4	71.3
% increase over previous year	110.9	3.1	19.4	36.1
Ontario as % of Canada	7.4	7.2	8.4	9.0

Among the 10 major Ontario export items to Japan seven of them are metals mainly in the form of ores, concentrates and scrap. Office machinery and equipment and plastics and synthetic rubber are the only fully manufactured exports.

Major Ontario Exports to Japan

<u>Commodity</u>	<u>1969</u>	<u>1970</u>
	\$ million	
Nickel in ores, concentrates, scrap	7.7	16.5
Copper in ores, concentrates, scrap	8.4	9.8
Primary iron and steel	5.0	5.7
Zinc in ores, concentrates and scrap	5.3	5.4
Nickel and alloys	0.6	5.2
Copper and alloys	0.5	3.9
Iron ores, concentrates and scrap	0.3	3.8
Office machines and equipment	3.9	2.7
Plastics and synthetic rubber, unshaped	2.0	2.4
Lumber	1.1	2.3

Metal ores are very important, too, in Canada's exports to Japan especially copper, iron and nickel. Other important items include wheat, wood pulp, lumber, coal and asbestos.

ONTARIO EXPORTS TO ITS MAJOR MARKETS

C) Ontario Exports to West Germany

Ontario exports to West Germany totalled \$78.1 million in 1970, a substantial increase of 24% over the 1969 total of \$63 million.

This represented 20% of total Canadian exports in 1970 to West Germany compared with 23% in the previous year.

The following table shows the trend in Ontario exports to West Germany over the past four years.

Ontario Exports to West Germany 1967-1970

	<u>1967</u>	<u>1968</u>	<u>1969</u>	<u>1970</u>
Value \$ million	41.4	54.2	63.1	78.1
% change over previous year	-4	+31	+16	+24
Ontario as % of Canada	23	24	23	20

Principal exports from Ontario include copper and alloys, cereals, oilseeds and nuts, and office equipment. All these items showed substantial increases in 1970 over the previous year. The ten major commodities exported from the Province to West Germany listed below accounted for 75% of the total in 1970.

Ontario Exports to West Germany 1969 and 1970

	<u>1969</u>	<u>1970</u>
	\$ million	
Copper and alloys	3.9	19.3
Unmilled cereals	1.8	13.7
Oilseeds, nuts, kernels	2.4	5.8
Office machines and equipment	1.9	5.3
Copper in ores, concentrates, scrap	6.5	4.7
Zinc in ores, concentrates, scrap	10.7	2.2
Measuring & laboratory equipment	3.4	2.0
Communications equipment	0.8	1.8
Road motor vehicles parts and accessories	1.0	1.7
Paper for printing	1.2	1.6

THE REGIONS OF THE UNITED STATES

ONTARIO EXPORTS TO ITS MAJOR MARKETS

D) Ontario Exports to the U.S. by Region and Commodity

The major markets for Ontario exports in the U.S. are the states of Ohio, Michigan, New York, New Jersey, Pennsylvania, Illinois, Indiana and Wisconsin. Together they accounted for just over 77% of the total value of Ontario exports to the U.S.

<u>Region</u>	Ont. Exports % of Total Value 1970	Cdn. Exports % of Total Value 1970	Regional Population % of U.S. Total
Ohio, Michigan	38	25	10
N.Y., N.J. Penn	28	26	19
Ill., Ind., Wisc.	11	11	10
New England	3	7	6
California-Hawaii	2	4	10
Del., D.C., Md, W. Vir., Virginia, N.C.	4	5	8
S. Carolina, Georgia, Fla.	1	2	7
Others	13	20	30
	100	100	100

There are a number of reasons for this dominance. First it should be noted that these eight States are among the most populous and most highly industrialized in the United States. For example, they account for 40% of the total U.S. population. Secondly, they are the nearest states geographically, to the major industrial and agricultural centres of Southern Ontario. Finally, and most importantly, we have to consider the impact of the U.S.-Canada Automotive Agreement on trade between Ontario and these eight states.

Thus 72% of Ontario's exports to Ohio-Michigan; 47% of exports to New York, New Jersey and Pennsylvania, and 37% of Ontario exports to Illinois, Indiana and Wisconsin in 1970 consisted of road motor vehicles and parts.

Another major commodity traded between Ontario and these three regions is forest products. In 1970 this group accounted for 20% of Ontario's exports to Illinois, Indiana and Wisconsin especially in the form of wood pulp and paper for printing. In the same year forest products represented 5% of Ontario exports to Ohio-Michigan, and a similar 5% of the total value to New York, New Jersey and Pennsylvania.

Ontario exports to the U.S. Grew by 10.5% between 1969 and 1970. There was strong growth in exports to New York, New Jersey and Pennsylvania (+52%) and to the South Atlantic states (+32%). The major market that showed an actual decline was Ohio-Michigan (-16.7%).

Ontario exports to the U.S. are much more regionally concentrated than are Canadian exports. Thus while Ohio, Michigan, New York, New Jersey and Pennsylvania accounted for 66% of the Ontario total to the U.S., their comparable share of Canadian exports was only 51%.

In 1970, Ontario exported live animals to the U.S. valued at \$29.3 million. The major part (43%) of these exports went to the Mid-Atlantic States (New York, New Jersey and Pennsylvania). The East-North-Central Region (Ohio, Michigan, Illinois, Indiana and Wisconsin) accounted for 27% of the total and the South Atlantic States (those which border the Atlantic between Delaware and Florida) took 8%. The main product exported under this category was cattle.

Food, beverages and tobacco exports to the U.S. from Ontario were valued at \$238.2 million. Over half of these went to the Mid-Atlantic and the East-North-Central States, mostly exports of meat and distilled alcoholic beverages (mainly Canadian whisky).

The U.S. imports of crude materials from Ontario were valued at \$282.4 million, (1970). Almost three-quarters of this went to the Mid-Atlantic and East North Central States. The major items exported to the Mid-Atlantic region were iron ores concentrates and scrap; nickel ores concentrates and scrap, and other crude bituminous substances. The main items exported to the East North Central region were iron and nickel ores, concentrates and scrap.

Ontario's exports of fabricated materials went primarily to the East North Central States: Ohio, Michigan, Illinois, Indiana and Wisconsin, which took 46% of the total value of exports in this category. The major items were wood pulp, paper for printing, nickel and alloys, castings and forgings, and plate, sheet and strip steel. 24% of Ontario exports of fabricated materials to the U.S. went to the states of New York, New Jersey and Pennsylvania. Here also wood pulp, paper for printing and nickel alloys were among the most important export items. In addition, precious metals were an important export to these Mid-Atlantic states.

76% of end product exports from Ontario to the U.S. went to the East-North-Central and the Mid-Atlantic regions. The dominant exports to the East North Central states were passenger automobiles and chassis, trucks and truck chassis, and other vehicles engines parts and accessories. The same pattern applied to the Mid-Atlantic states.

ONTARIO EXPORTS BY STAGES OF FABRICATION - 1970

We are able to present for the first time tables on Ontario's exports by stage of fabrication to all countries and areas with which the Province trades.

These tables compare the value of exports of crude materials with both fabricated materials and end products from Ontario to a particular country or region.

It will be noted that these three groupings differ somewhat from the five major groupings into which Ontario's exports are normally divided, i.e., live animals; food, feed, beverages and tobacco; crude materials, inedible; and end products, inedible.

The correlation however, is quite a simple one. Thus live animal exports have been grouped by Statistics Canada into the crude materials category. Specific items from food, feed, beverages and tobacco have been grouped with either crude materials, fabricated materials or end products, depending on whether they are exported in an unprocessed, semi-processed or fully processed state.

In other words: crude materials includes all products in the crude materials, inedible category, together with "unprocessed foods, beverages and tobacco products", such as "fresh fruits, fresh vegetables and unmanufactured tobacco", together with live animals.

Fabricated materials groups all products in the fabricated materials inedible category, with semi-processed food-stuffs, mainly commercial feed stocks and milled cereals.

End products includes all fully manufactured goods, i.e., all end products inedible, plus processed foods, alcoholic beverages, and tobacco products.

In 1970, Ontario domestic exports to all countries were worth \$7.26 billion of which 12% consisted of crude materials; 23% of fabricated materials and 64% consisted of end products. This pattern however, varies markedly between trading areas.

In the case of the U.S. we find that 72% of Ontario domestic exports to that country are fully manufactured goods. If we eliminate automotive exports, though, we find that only 39% of the new total consists of end products, i.e. over 60% are crude materials and fabricated materials.

This situation is even more extreme in the case of Western Europe and Japan. Thus only 19% of the Province's domestic exports to Western Europe are fully manufactured goods; only 16% of Ontario's domestic exports to Japan are accounted for by end products.

It is normal, for trade between advanced industrial economies to consist mainly of fully manufactured goods. This is clearly not the case with Ontario's exports to most of the OECD countries. This reflects Canada's role as a resource hinterland for Western Europe, the U.S., Japan and, to a lesser degree, even Eastern Europe.

In contrast, Ontario exports to Central and South America, Africa and the Middle East consist primarily of fully manufactured goods. Normally over 70% of the total value of goods to these areas consists of end products.
